-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Priority

No priority claimed.

Information Disclosure Statement

The information disclosure statement (IDS) filed 3/29/2004 is being considered by the examiner.

Drawings

The drawings are objected to because each figure should have a unique figure number, such as Figure 1A; and reference numbers can not be shared between figures. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be

Art Unit: 3679

notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's prior art Figure 1 in view of US patent 1369913, Brunhoff.

In regards to claim 1, Applicant's prior art Figure 1 discloses a coupling comprising two half shells, and a seal. Applicant's prior art Figure 1 does not disclose a plurality of toggle clamps, wherein, actuation of the toggle clamps causes the half shells to encompass and lock together the conduit ends and the seal prevents leakage in or out of the conduit ends. Brunhoff teaches a plurality of toggle clamps (41, 42) "to

Art Unit: 3679

provide an improved lever mechanism for closing and sealing the joints and applying the strain at both ends of the saving device [half shells]". It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a plurality of toggle clamps to provide an improved lever mechanism for closing and sealing the joints and applying the strain at both ends of the saving device [half shells], as taught by Brunhoff.

In regards to claim 2, Applicant's prior art Figure 1 discloses the two half shells containing a plurality of gripping teeth.

In regards to claim 3, Applicant's prior art Figure 1 discloses the plurality of gripping teeth being saw-toothed shaped circumferential ribs.

In regards to claim 4, Applicant's prior art Figure 1 discloses the plurality of gripping teeth being saw-toothed shaped scallops.

In regards to claim 5, Applicant's prior art Figure 1 discloses the two half shells containing circumferential ribs that compress the seal into contact with the conduits.

In regards to claim 6, Applicant's prior art Figure 1 discloses the two half shells being made of material significantly harder than the soft plastic conduits.

In regards to claim 7, Applicant's prior art Figure 1 discloses the two half shells being made of relatively hard plastic material.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure because it illustrates the inventive concept of the invention.
